A beautifully produced botanical animation series developed for children by Azuma Makoto to show them the deep connection between flowers and ourselves, and the power and potential of flowers. Part 1 explores the life cycle of flowering plants as they pass on the baton of life, rebirth and decay, in a continuous, endless cycle. Part 2 delves into the relationship between flowers and humans: the way we involve flowers in our lives through various cultures and practices. The animation looks at flowers not from a material viewpoint; instead seeing them as symbols of connection, a way we share emotions.
